What is this program ?

The focus of this 9-day workshop is on applying Success Factor Modeling™ to become an effective "entrepreneur." An entrepreneur, in this sense, means anyone who has an idea or project that he or she would like to see become a viable reality. The program emphasizes the importance of developing an "entrepreneurial spirit" and applying Success Factor Modeling™ to identify some of the key patterns of inspiring and successful entrepreneurs. A core goal of this program to help participants become more confident, innovative, proactive and generative.
